

The Chipmunk Simulator

This unique simulator based on a De Havilland Chipmunk WB626 has been produced by RC Simulations of Bristol. They constructed a software Chipmunk from scratch as well as a custom instrument panel with vintage instruments, and the virtual Chipmunk's performance has been designed to match the real aircraft's Pilot Operating Handbook.

The flight simulator enables a full illustration of the theoretical and practical aspects of flying, and provides hands-on experience with the aim of developing a sense of air-mindedness in young people.
